BeeOne Grade 3 Math Workbook

John Carty wrote this book to get parents involved in their child's mathematics education, especially that aspect involving word problems. It goes from age 10 to year 10, so you don't need any Calculus to do any of the questions. A sound grasp of Algebra would help in many cases. There are 777 questions across 7 categories (chapters) and John's ideal was a child could start doing 3 or 4 questions a week, and this way could be aged 16 before you get through all 777 successfully. All answers are provided. Hints for problem solving are detailed in the forward, but are in no way exhaustive. In learning there is nothing wrong with repetition and to go through some chapters 2 or 3 times, would enhance maths problem-solving skills in many students. In some cases, there are what maths educators call 'elegant solutions' but in others, a parent may come up with a different pathway to the correct answer. John has been involved in using mathematics and in mathematics education all his life and feels bringing in the parents is a possible strategy to increasing the capacity of a child's mathematical toolkit.

10 Minutes A Day Problem Solving, Ages 7-9 (Key Stage 2)

This is a collection of classroom materials that helps elementary school teachers integrate nutrition education into math, science, English language arts, and health. Introduces the importance of eating from all five food groups using the MyPlate icon and a variety of hands-on activities. The MyPlate nutrition program replaces the MyPyramid food pyramid.
